SURFACE PREPARATION

Remove as much mould, algae, lichen or moss as possible by scraping and brushing, before treating with **Weathershield** Multi-Surface Fungicidal Wash.

Weathershield Multi-Surface Fungicidal Wash will only be effective on surface growths. Where old growths have been trapped between coats during a previous re-decoration, all existing coatings will need to be removed in order to treat the surface effectively.

SYSTEM INFORMATION

Mix thoroughly by shaking the container.

Apply the solution by brush only to all affected areas.

Leave for 24 hours and then thoroughly rinse and scrub with clean water to remove residues and dead growth.

Failure to remove residues may result in discolouration of subsequently applied coatings.

Repeat the process if necessary.

On badly affected areas or where lichen is present the use of high pressure water-hosing may be necessary to remove all organic growth completely.

Do not apply in wet weather.

When the surface is fully dry, apply the appropriate **Dulux Trade** or **Weathershield** finishing system.
